Suggestions for NEW Indicators

- Funding/ government investment in services

We Achieve our Full Potential	We are Healthy	Our Basic Needs are Met	We are Safe, Just and Engaged
Debt (overall) Debt (student) Childcare access School discipline Wealth gap Gig-economy Fastest growing jobs Graduation rate from higher-education	Preventative care Clinician burnout/ turnover Water quality Maternal mortality rate Overall physical health Pre-diabetic rates of elementary students	Access to transportation and parks Evictions/ involuntary moves Homeownership trends Non-governmental services provided Track people no longer qualifying for public assistance	Social capital – regional

Suggested Changes to the Dashboard Report

- Include root causes of the issues and connection between indicators
- Create interactivity online (superimposed mapping and multivariable analysis)
- Sections that could be read, used, and related to by school-aged children
- More aspirational goals while still recognizing incremental successes
- National landscape focus
- Involve Austin Police Department
- Improve data visualization (make graphs easier to read, label better, and infographics)
- Comparison to other successful communities
- Projections for indicators based on trends
- Better define vision/ purpose of Dashboard
- Include more youth data pertaining to health and equity
